

These are some of the common questions asked by our clients before they sign up for our custom dashboards.

If you are one of those still thinking whether to build one for you, please read on

At Indevia we practice Lean principles of Management wherein Value comes first. One of the ways to get closer to Value is being able to **“see”** in terms of data – quickly, easily and take corrective actions. In the land of Lean, this is known as Visual Management

To see or not to see: the choice is yours

90% of information transmitted to the brain is visual and in terms of speed, the brain processes visual information 60,000 times faster than text.

Now imagine page-long financial statements and reports that are necessary. How quickly can you scan the variances? Most importantly, how much time do you have at hand?

Indevia's Purpose Built dashboards

With that in mind, we designed dashboards meant to give you 3 views - **all in one screen**, with multiple slicing and dicing features and ability to interact with your data

Not only these, our dashboards totally synch into your GLs and P&Ls – it does not matter which accounting software you use. They are **built by our data engineers, vetted by our accountants** and reported on a weekly basis. The dashboards are fully viewable on you Tablet or mobile

Pricing (Available as an add on | Free for Diamond packages)

Dashboards typically start @ \$299 as one time set up and then on a monthly subscription model for as low as \$15 per store per month. Additional fees can be applicable if data sources are more complex and more features need to be packed

[Book a free demo](#) (15mins) to experience our dashboards and see if this can help you in any way.
